RESEARCH ON THE ADHESIVE BONDING OF STEEL.
[1963] [34p] (figs credited) 10 refs
Order from SIA \$3.80

63-20346

Trans. of der Stahlbau (West Germany) 1961 [v. 30]
no. 1, p. 16-23.

DESCRIPTORS: *Steel, *Bonding, Adhesives, Stainless
steel, Surface properties, Mechanical properties.

The results of the investigations show that a successful
adhesive bonding of steel is feasible. The knowledge
and experiences gained in aluminum-bonding are
applicable. However, different characteristics of
material and other application procedures will add new
factors. For example, the spraying with blasting
corundum by the "Vacu-Blast" method can be regarded
as a most effective pretreatment of adherend surfaces.
